PROFESSIONAL SUMMARY

Business Analyst and Senior Quality Assurance Tester with extensive experience gathering and validating business requirements, designing test plans, executing complex SQL queries, and managing defects in JIRA within Agile environments. Experienced collaborating with business stakeholders, developers, and QA teams to review user stories, validate acceptance criteria, and deliver high-quality software solutions. Skilled in manual testing, data validation, defect management, and SDLC processes, contributing to the successful delivery of mission-critical applications. Passionate about improving business processes and ensuring software solutions meet business and functional requirements.

SECURITY CLEARANCE

- **Active Top Secret Security Clearance**

SKILLS

- **Testing & Validation:** System, Integration, Functional, Regression, and UAT coordination ; SQL data validation; requirements and user story validation; root cause analysis.
- **Business Analysis:** Requirements gathering, business process analysis, user stories, acceptance criteria, stakeholder collaboration, SDLC.
- **Test Management:** Test plans, test cases, defect tracking, JIRA, documentation, requirements traceability.
- **Agile:** Agile/Scrum methodologies, sprint planning, backlog refinement, cross-functional team collaboration.
- **Database:** Complex SQL queries, data validation, report verification, database testing.
- **Problem Solving:** Analytical thinking, process improvement, defect resolution, adaptable to changing business needs.
- Adept at identifying software defects, performing root cause analysis, and providing insightful recommendations for performance and UI improvements.
- **Adaptability & Problem-Solving:** Proven ability to quickly adapt to new projects and consistently deliver high-quality work. Possesses strong out-of-the-box thinking to anticipate a wide range of use case scenarios and identify potential software vulnerabilities.

EDUCATION|CERTIFICATIONS

Henry Ford Community College <i>Computer Information Systems - Application Developer</i>	May 2011 <i>Dearborn, MI</i>
National Institute of Technology <i>Medical Assistant Diploma, Medical Assistant</i>	2004 - 2005 <i>Dearborn, MI</i>
Information Technology Center <i>Advance Diploma in Computer Science and Application, Computer Science and Application</i>	1995 - 1996 <i>Mogri, India</i>
Department Of Electronics Government of India <i>Completion of DOEACC "O" Level Examination</i>	1996 <i>New Delhi, India</i>
Sardar Patel University <i>Bachelor of Science, Microbiology</i>	1990 - 1993 <i>V.V. Nagar, India</i>

PROFESSIONAL EXPERIENCE

BigBear.ai Jan 2022 - Aug 2025

Sr. Quality Assurance Tester Ann Arbor, MI

- Collaborated with business stakeholders, developers, and QA teams to review business requirements, user stories, and acceptance criteria within Agile sprints.
- Executed System, Integration, Functional, Regression, and User Acceptance Testing (UAT) to validate business

and functional requirements for AST (DoD) SIPR and NIPR application deployments while tracking defects in JIRA.

- Prepared and executed complex SQL queries to validate application data, identify inconsistencies, and ensure data integrity across test environments.
- Designed and maintained test plans, test scenarios, test cases, and testing procedures to ensure complete coverage of business and functional requirements.
- Performed root cause analysis, documented defects, and partnered with developers to resolve issues and improve application quality.
- Tracked defects, test execution, and project progress in JIRA while providing clear status updates to project stakeholders.
- Mentored new QA testers, demonstrating applications and guiding them to write bugs and test cases in JIRA, which shortened onboarding time and improved overall test coverage

ProModel/BigBear.ai

Jul 2012 - Dec 2021

Quality Assurance Tester

Ann Arbor, MI

- Executed manual and automated testing for AST SIPR/NIPR and DST applications, validating business and functional requirements before production releases.
- Collaborated with developers and QA team members to review requirements, document defects, and ensure successful implementation of software enhancements.
- Performed regression testing of core features after each release, confirming that existing functionality remained bug-free and maintaining the system.
- Developed complex SQL queries to validate report outputs and verify data accuracy before production deployment.
- Created comprehensive test plans, test cases, and automated testing scripts using SQL and Selenium to improve testing efficiency and release quality.
- Logged, tracked, and verified software defects in JIRA throughout the Agile software development lifecycle.

Mcford Pediatrics

Oct 2005 - Jun 2012

Medical Assistant

Dearborn Heights, MI

- Performed clinical and administrative duties, such as scheduling appointments, processing paperwork, and supporting the medical team, ensuring smooth clinic operations.
- Administered vaccines (e.g. influenza, MMR) to pediatric patients, following CDC guidelines and recording each dose in the MCIR system, maintaining up-to-date immunization records.
- Improved communication by regularly interacting with patients and families, clearly explaining procedures and coordinating with physicians, which increased patient satisfaction.
- Handled patients' immunization records in the MCIR system, verifying data accuracy and updating entries, which reduced record errors.
- Provided patient education on nutrition, medication adherence, and preventive care using brochures and visual aids, leading to better patient understanding.

Missouri Dept. of Transportation (MoDOT)

Jan 2000 - Mar 2002

Software Programmer

Jefferson City, MO

- Participated in the Software Development Life Cycle (SDLC), collaborating with project teams to develop, test, and maintain software solutions.
- Created and optimized PL/SQL scripts and SQL queries for data validation, reporting, and payroll processing.
- Supported Agile development practices by assisting with test planning, documentation, and software validation activities.

- Organized and maintained database using Oracle 7.3 / Developer 2000 to provide accurate student records.
- Managed all phases of application design-including coding, prototyping, system testing, integration, and deployment-using FoxPro 2.5, which delivered a fully functional application on schedule and met user requirements.
- Led a team of developers to design and build an inventory management system with FoxPro 2.5, delivering a solution that streamlined stock tracking and improved data accuracy
- Taught students core programming concepts, techniques, and languages through hands-on labs and real-world examples, resulting in improved coding proficiency and higher course completion rates.
